

CARTONBOARD PACKAGING

Dear Partners and Colleagues!

Let Origamo, a cartonboard packaging manufacturer, present you our Price List.

We offer high-quality, home-made products – all types of products are made of cartonboard and micro-corrugated board.

In our Price List, you'll find our entire range of in stock items, from which you can choose the items you need.

In addition to items in stock, our Design Dept. can do the following:

- *develop design solutions and mock-ups of your individual packaging*
- *produce blank or custom printed packaging using various printing techniques (offset, foil stamping)*
- *apply hot or cold laminating film to your packaging, laminate precut windows, and apply varnish (UV, offset, WD) to where you need.*

In the manufacture, we use matte and gloss film, metallised film, anti-fog film, perforated and biodegradable film. We provide high-quality gluing and lamination of the packaging so your food can be heated in microwaves, combi steamers and convection ovens; use the packaging in flash freezing and other technologic application environments. Valuing our reputation and the reputation of our partners, we do business fairly and legitimately, you can always rely on us.

You can entrust us with your most challenging cartonboard packaging tasks.

With respect to you and your business,

Sergey Maralin

Origamo, General Director

From idea to embodiment

Got an excellent idea, but don't know what to begin with?

Begin with the packaging.

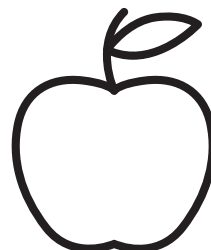

We offer you a turnkey packaging solution, or can redesign the existing packaging. We'll complete your order quickly and without any troubles!
